

A SIMPLE DAILY ROUTINE. CLEANSE. APPLY. MOISTURIZE. PROTECT.

1 CLEANSE

The area to be treated with a mild or soap-free cleanser (such as Cetaphil® Gentle Skin Cleanser).

2 APPLY

Once skin is dry, apply a thin layer of AKLIEF® (trifarotene) Cream, 0.005% to the affected areas once daily in the evening.

One pump for the face, two pumps for the chest, shoulders, and back.

3 MOISTURIZE

Your skin with a product (such as Cetaphil® Moisturizing Lotion) as often as needed to help minimize skin dryness and irritation.

4 PROTECT

By using sunscreen with SPF 15 or higher (such as Cetaphil® DermaControl Oil Absorbing Moisturizer with SPF 30) and wearing protective clothing.

NOTES:

IMPORTANT SAFETY INFORMATION

Indication: AKLIEF® (trifarotene) Cream, 0.005% is a retinoid indicated for the topical treatment of acne vulgaris in patients 9 years of age and older. **Adverse Events:** The most common adverse reactions (incidence \geq 1%) in patients treated with AKLIEF Cream were application site irritation, application site pruritus (itching), and sunburn. **Warnings/Precautions:** Patients using AKLIEF Cream may experience erythema, scaling, dryness, and stinging/burning. Use a moisturizer from the initiation of treatment, and, if appropriate, depending upon the severity of these adverse reactions, reduce the frequency of application of AKLIEF Cream, suspend or discontinue use. Avoid application of AKLIEF Cream to cuts, abrasions or eczematous or sunburned skin. Use of “waxing” as a depilatory method should be avoided on skin treated with AKLIEF Cream. Minimize exposure to sunlight and sunlamps. Use sunscreen and protective clothing over treated areas when exposure cannot be avoided. You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch or call 1-800-FDA-1088.
